

# 6000 Series Waterproof Pen Type Tester

*pH · ORP · Conductivity · TDS · EC*

## Features

- Fast response, reliable and accurate measurements.
- 21 x 18 mm Large LCD display for easily reading.
- Impact resistant ABS case.
- IP 57 waterproof rated.
- 1 or 2 points (pH only) manual calibration via screw trim pot.
- The electrode module can be changed by users easily.

## Water Testing Kit

Our AQUASOL range of water testing kits are extremely simple and easy to use & make monitoring convenient and quick, thus preventive action can be taken immediately. You neither have to be a trained chemist nor require any experience to get reliable results from these test kits.

AQUASOL water testing kits based on standard and established analytical methods, backed by chemical research. These are simple adaptations of classic chemical analytical methods. The ...

### Alkalinity Test Kits

Approx. **Rs 955 / Kit** [Get Latest Price](#)

#### Product Details:

Minimum Order Quantity	1 Kit
Brand	Aquasol
Material	Plastic
Range	10-200, 100-2000 mg/l as 5-100, 25-500 mg/l as cacc
I Deal In	New Only
Code	AE-204 and AE-214
No of test	300

[Get Best Quote](#)

The alkalinity of water is capacity of water to acid to desired ph. It is mainly a sum of bicarbonate and hydroxide ions. Salts of v like borate, silicate and phosphate may also to alkalinity. Alkalinity is important in the tre

potable water, waste water, boiler and cooling water. Our alkalinity kit is available in two ranges easy to use test to gives reliable results.

Details:

Code	Range	Nc
AE-204	10-200, 100-2000 mg/l as caco3	
AE-214	5-100, 25-500 mg/l as caco3

# Hardness Test Kit

Approx. **Rs 1,080 / Kit** [Get Latest Price](#)

## Product Details:

Minimum Order Quantity	1 Kit
Brand	Rakiro
Product type	Test Kit

[Get Best Quote](#)

When water passes through or over deposits such as limestone, the levels of  $Ca^{2+}$ ,  $Mg^{2+}$ , and  $HCO_3^-$  ions present in the water greatly increase and cause the water to be classified as hard water. Hardness in water is caused by dissolved minerals and calcium and magnesium ions are usually present in significant concentration along with other divalent ions. Hardness creates scale deposit problem which lead to energy loss in different industrial systems ,such as boiler, cooling system, cause scale formation in plumbing, heating appliances, and boilers. Measuring total hardness is essential to monitor – softener, demineralization, RO plant, softening processes, etc. Our AQUASOL hardness range is one of the largest available in the market today. It is a premium kit and finds use in almost all industries, where water is the most important ingredient/parameter.

# Calcium Hardness Test Kit

Approx. **Rs 955 / Kit** [Get Latest Price](#)

## Product Details:

Minimum Order Quantity	1 Kit
Code	AE-202 and AE-212

Range	5-100 mg/l as $\text{CaCO}_3$
-------	-------------------------------

No of test	300
------------	-----

[Get Best Quote](#)

Calcium hardness is caused by the presence of calcium ions in the water. Calcium salts can be readily precipitated from water and high levels of calcium hardness tend to promote scale formation in the water system. Calcium hardness is an important control test in industrial water systems such as boilers and steam raising plants. Our kit tests even high levels of calcium in water.

**Details:**

Code	Range	No of test
AE-202	5-100 mg/l as $\text{CaCO}_3$	300
AE-212	25-500 mg/l as $\text{CaCO}_3$	300

## Hydrogen Peroxide Test Kit

Approx. **Rs 1,590** / Kit [Get Latest Price](#)

### Product Details:

Minimum Order	1 Kit
---------------	-------

Quantity	
Code	AE-HP
Range	5-100 & 50-1000 mg/l as h2o2
No of test	300

Get Best Quote

The corrosiveness of process water due to hydrogen peroxide depends on the amount of dissolved oxygen that is produced. Oxygen corrodes iron-containing metals. Hydrogen peroxide is used as a disinfectant. H2o2 is used to disinfect drinking water. It is also used to combat excessive microbial growth in water systems and cooling towers. AQUASOL hydrogen peroxide test kit helps to estimate the concentration of h2o2 in water.

Get Latest Price

## Product Details:

Minimum Order Quantity	1 Kit
Code	AE-2tn
Range	5-100, 25-500 mg/l as tannin
No of test	300

[Get Best Quote](#)

Tannin is a natural organic material that is the by product of nature’s fermentation process, created as water passes through peaty soil and decaying vegetation. Tannins create a light yellow to dark brown discoloration of the water, and cause yellow staining on fabrics, fixtures, and laundry. Tannin based formulations are used for prevention of scale and corrosion in steam boilers, closed cooling systems and steam locomotives. The tannin test kit is a titrimetric one and has reagents for 2 ranges in the same kit, making it portable and user friendly.

AQUASOL test kits are available for almost all water parameters as mentioned below.

Get Latest Price

## Product Details:

Minimum Order Quantity	1 Kit
Code	AE-210 and AE-210h
Range	0.2-2.0, 0.5-5.0 mg/l as fluoride and 1-20 mg/l as fluoride
No of test	500

**Fluoride Test Kit** occurs naturally in all types of water. Typically, surface waters and sea waters have low concentration of fluoride while groundwater may contain high levels of fluoride as it may be exposed to many inorganic fluoride-containing minerals. Fluoride salts are also frequently encountered in many industrial applications. Fluoride is important in drinking water as excessive fluoride cause mottling. A permissible limit has been laid down for fluoride therefore analysis of fluoride is mandatory in drinking water. Our fluoride water test is one of its kinds and works on the titrimetric principle. The end point is a clear yellow.

Range	0.05,0.1,0.3,0.4,0.7,1.0,1.5,2.0 mg/l as fe and 0,2,4,6,8,10 mg/l as iron
No of test	175

**Iron Test Kit** is a naturally occurring mineral found in water especially groundwater which has come in contact with iron-containing rock or soil. Insoluble iron can clog valves and strainers and can cause excessive sludge build up in low lying areas of a water system. It also leads to boiler deposits that can cause tube failure. Suspended or dissolved iron coming in the feed water will also deposit on the boiler metal. Checking iron in boiler and cooling water helps to monitor corrosion level in water. AQUASOL iron test gives a clear red colour result which is then compared with the colour chart provided.

## Nitrite Test Kit

Approx. **Rs 1,205 / Kit** [Get Latest Price](#)

### Product Details:

Minimum Order Quantity	1 Kit
Code	AE-207 and AE-217
Range	5-100, 50-1000 mg/l as nano2 and 0.04-0.8 mg/l as no2
No of test	300 - 400

**Nitrite Test Kit** occur in water as an intermediate product in the biological breakdown of organic nitrogen, being produced either through the oxidation of ammonia or the reduction of nitrate. The presence of large quantities of nitrites is indicative of waste water pollution. Low range nitrite estimation is useful

## Chloride Test Kit

Approx. **Rs 1,445 / 1 Kit** [Get Latest Price](#)

### Product Details:

Minimum Order Quantity	1 1 Kit
------------------------	---------

Brand	Rakiro - AQUASOL
Range	1-20 mg/l as Chloride
Product Code	AE 213L

Chloride Test Kit

Chloride ions are one of the major inorganic anions in water and wastewater. Although high concentrations of chloride in water are not known to be toxic to humans, they may corrode metal pipes. It is essential to monitor chloride concentration in boiler systems to prevent damage of metal parts. In high levels, chloride

## Our Product Range

- ▶ Water Testing Kit
- ▶ Bacteria Testing Kits - Dipslide
- ▶ Multiparameter Water Testing Kit
- ▶ Cooling Water Chemicals
- ▶ Boiler Water Chemicals
- ▶ Specialty Chemicals
- ▶ Reverse Osmosis Chemicals
- ▶ Handheld Pen Type Meters
- ▶ Bench Top Meters
- ▶ pH Electrode
